COMMUNITY SOLAR CAMPAIGN

January 30, 2024

By participating in community solar, New Yorkers can receive electric bill savings, [reduce their carbon footprint](#), and support local clean energy jobs.

New York State leads the nation with over 2 GW of community solar installed by the end of 2023, powering over 400,000 homes. NYS has a goal of 6 GW installed by 2025.

[Community solar](#) allows a variety of customers – homeowners, renters, businesses, and nonprofits – to tap into the economic and environmental benefits of solar power without installing panels on the property. Customers buy their electricity from solar farms and then receive savings onto their existing utility bill.

No upfront costs and a simple sign-up process. Receive 5-10% discount on the generation cost of the electricity.

Learn more: Reach out to the Town of Jay offices, Michelle Axtell at supervisorsclerk@townofjayny.gov or Ph: 518-647 2204 or Tyler Eaton of the Town of Jay Climate Smart Community Solar campaign at ttree68@gmail.com or Ph: 518-524-1482. If you do sign up for Community Solar, please do let us know as well, as the Town of Jay is incentivized by NYSERDA based on the number of sign-ups.
